## Southeastern Pavement Preservation Partnership (SEPPP) Meeting

Oklahoma City, Oklahoma was the setting for this year's meeting of the SEPPP. There are 4 such partnerships spread over the USA and each are coalitions of states that get together yearly to share ideas on Pavement Preservation. Various committees work on issues between meetings.

There were 21 sponsors of this meeting and 5 of them were Colas companies, namely Colas Solutions, Ballou Pavement Solutions, Heartland Asphalt Materials, Southeast Pavement Services and Strawser/Terry. Ballou rolled out their new display at this meeting and it attracted a lot of positive comments. The Colas Solutions' booth was manned by Nelson Wesenberg, Martin Thompson and Bob Friedline.

A lot of valuable new contacts were made and several existing contacts within the Oklahoma DOT were renewed and reinforced. Between conference sessions we visited the FiberMat job done by Heartland Asphalt Materials, Inc. last year in Oklahoma and it looked great.
